

The Power to Do More

More power, more savings and more possibilities with Energy Hub

[Play Video](#)

Invest in Peace of Mind

One smart home energy system for today and tomorrow

SolarEdge is taking reliable home energy into the future with the next-generation inverter, Energy Hub. Be battery-ready, EV-ready and future-ready with a single solution.

99%

Record breaking inverter efficiency for maximum self-consumption and energy savings

A system that grows with you: add-on smart energy home products to control and optimise more appliances

Connect our SolarEdge Energy Bank battery with advanced home backup

Be ready to power an electric vehicle

Maximise Your Solar Savings with Energy Bank

Life is unpredictable.

Your energy shouldn't be.

Increase energy independence and saving by adding multiple Energy Bank batteries.

Weather any grid outage by installing our advanced battery backup solution. Even connect to a generator for extended backup power.

Handheld Convenience

Manage it all with one app: mySolarEdge

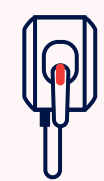

mySolarEdge helps you keep an eye on energy usage, battery levels, EV charging, and more

Seeing is saving: with built-in meters, a simple CT connection unlocks advanced monitoring to help keep utility bills low

Manage a growing range of features, including future smart energy add-ons

Control EV charging: remote start-and-stop charging, smart-schedule when rates are low

Be ready for anything — ensure your battery levels are where you want them

Track energy usage and keep bills low with real-time energy monitoring

Schedule usage during high solar production periods or non-peak times

Decision Proof. Future Proof.

Meet tomorrow's needs today
in a single solution

Eliminate the hassle of ever having to choose between solutions with one comprehensive platform that connects to it all: battery, EV charger, advanced monitoring and more.

With a growing line of efficient SolarEdge smartenergy products, you'll be able to take Energy Hub into the future. Continue maximising savings and convenience by going with a system that matches your evolving needs.

Better Together

Designed for seamless integration with the Energy Hub inverter to maximise performance and savings

- / Connect up to three batteries per Energy Hub inverter
- / Add extra solar panels to maximise battery charging
- / Stay on when the grid is off with our advanced Backup Interface. Allows connection of up to three Energy Hub inverters and a compatible generator
- / Streamlined support from one manufacturer

Back

An EV Charger Powered By the Sun

/ Drive on Sunshine:

Charge on up to 100% renewable energy, using excess solar mode*

/ Save Money:

Get EV with PV and avoid the time, cost and hassle of main panel upgrades. Use smart scheduling to charge when utility rates are low

/ Built to Last:

Industry-leading 5-year warranty

/ One Convenient App:

View and manage EV and PV in one app

* Smart EV Charger can connect to Energy Hub inverters. An import/export meter is required for controlled excess solar charging
